

OASIS Iris Expander

The OASIS Iris Expander is a 6.25mm or 7.0mm diameter polypropylene ring that expands the pupil and maintains access and visibility throughout the surgical procedure. The disposable device is indicated in cases where Miosis and Intraoperative Floppy Iris Syndrome are present.

Each OASIS Iris Expander is easy to insert and remove and gentle to fragile iris tissue. Each OASIS Iris Expander is packaged sterile with its own easily loaded disposable injector, 1 expander per box.

- Unimpede view during complicated small pupil surgeries
- four pockets that gently cradle the ocular tissue without pinching or clamping
- once removed, the iris returns to its normal shape and function
- also used to manage Floppy Iris Syndrome (IFIS)
- Easy removal without potential tearing

Details:

- 1 per box
- For pupil expansion
- Contains ring and disposable injector
- Available in both 6.25mm and 7.0mm diameter
- Polypropylene material
- Sterile, single use
